**XPO POLLUTION CONTROL
IS A VALUE DRIVEN
COMPANY**

ABOUT US

XPO Offshore Pollution Control Ltd. is a leading waste management company specializing in the responsible handling and disposal of marine waste under the International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) regulations.

With a deep commitment to environmental protection and sustainability, XPO Offshore Pollution Control Ltd. (XPO) offers comprehensive waste management solutions tailored to the unique needs of the maritime and oil & gas industry. We strive to ensure a cleaner and healthier marine environment by adhering to strict international standards and best practices.

Our dedication is evident in our efforts to continuously improve waste reduction strategies and contribute to a cleaner planet.

As leading provider of offshore waste management services for the oil and gas industry. We specialize in handling waste generated during offshore drilling, production, and exploration activities.

Our comprehensive services encompass the collection, transportation, treatment, and disposal of waste materials while adhering to the highest industry standards and regulatory compliance.

OUR VISION

At XPO, our vision is to be a leading and trusted partner in providing comprehensive waste management solutions for the maritime and oil & gas industry.

We envision a future where responsible waste management practices are an integral part of every offshore operation, preserving the marine ecosystem for current and future generations. Through innovation, collaboration, and unwavering dedication, we aspire to set new industry standards and be at the forefront of offshore waste management solutions worldwide.

OUR MISSION

Our mission at XPO is to pave the way for a cleaner and healthier offshore environment.

With a strong commitment to environmental stewardship and operational excellence, we strive to protect marine ecosystems and promote sustainable practices while assisting our clients in achieving their waste management goals efficiently and responsibly.

OUR CORE VALUES

At XPO, we are guided by a set of core values that form the foundation of our operations and define our commitment to excellence, environmental responsibility, and client satisfaction.

Our values are:

SAFETY

We make safety a priority in our operations.

PASSION

We achieve excellence from our desire to do the work.

INTEGRITY

Upholding honesty, transparency and ethical conduct in our business

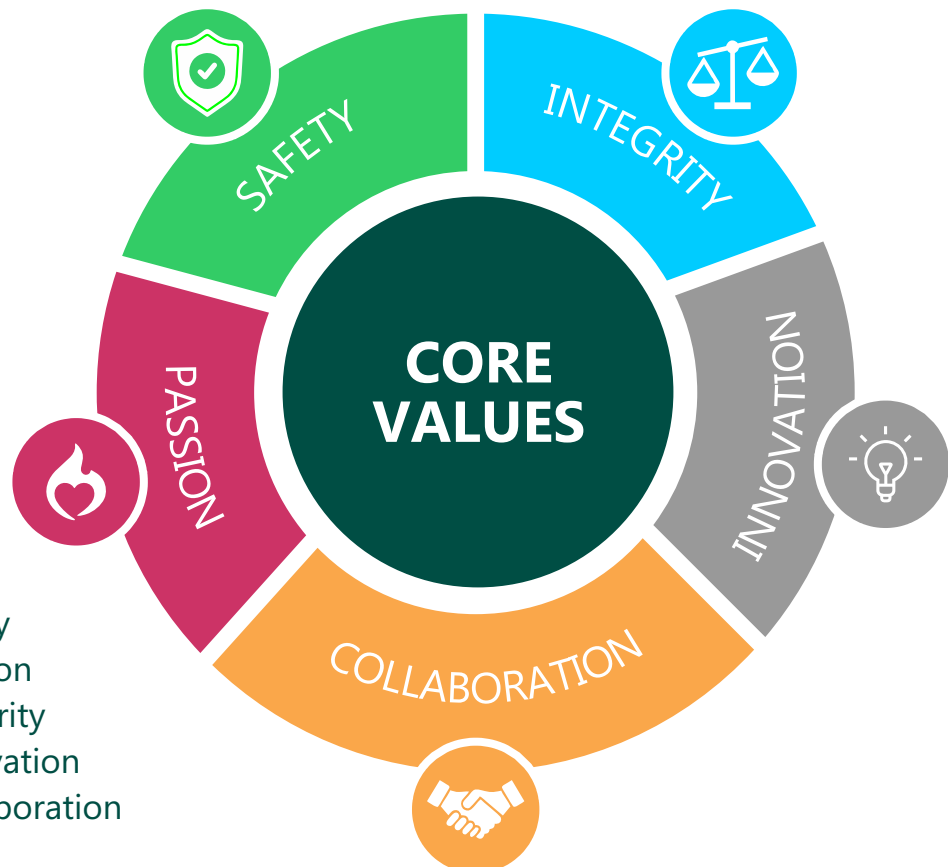

INNOVATION

We proactively seek innovative solutions to assure the right applications in our operations.

COLLABORATION

We work together to achieve a common goal

- Consultancy and Compliance Services
- Environment Pollution Control
- Spill Control.
- Solid Control
- ROV Survey Services

Waste Collection and Segregation

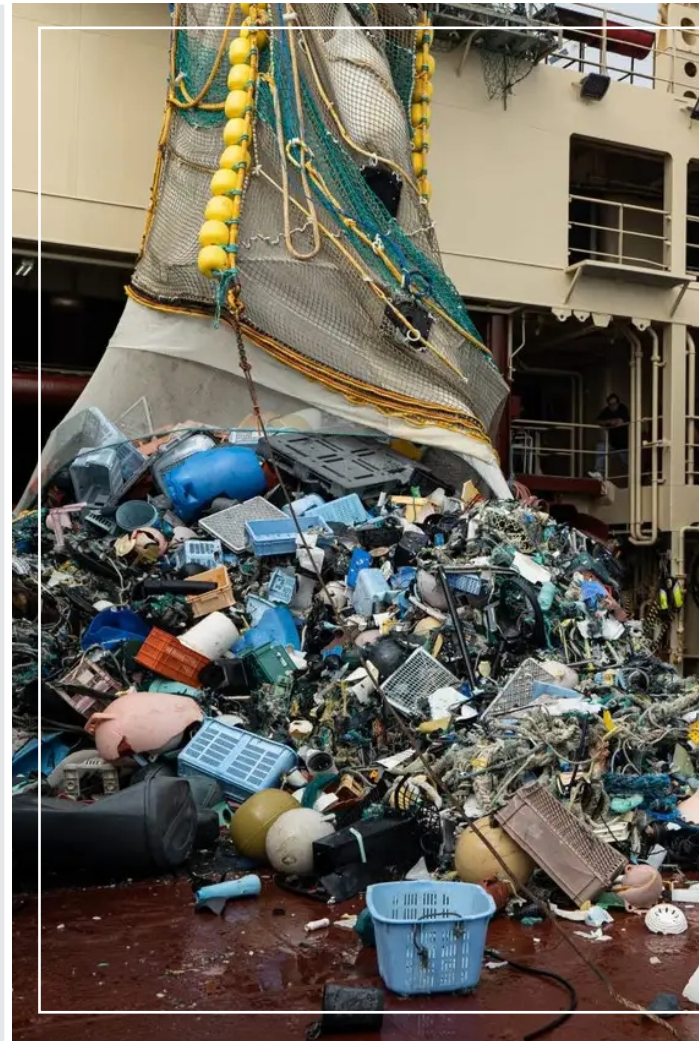

At XPO Marine limited, we provide services for various types of MARPOL waste.

We have trained professional for the collection and segregation of different categories of waste which are not limited to:

- Oily bilge water
- Sludge, sewage, and garbage
- Bilge water
- Lubricants
- Fuel and oily waste from vessels
- Slops and de-bunkering waste
- Waste from the fight-against-pollution at sea
- Domestic and Food waste.

Our expert team ensures that waste are carefully collected and segregated and properly stored, minimizing its impact on the environment.

Our fleet of vessels are equipped with modern waste receptacle equipment for offshore waste collection and segregation.

**FIRSTCLASS SERVICE
DELIVERY
...THE XPO WAY**

OUR SERVICES

Waste treatment

At XPO Pollution Control, we are poised in delivering state-of-the-art technologies and environmentally sound methods to treat and recycle waste.

Our advanced treatment facility are equipped with modern Thermal Desorption Unit (TDU) and incinerator and to enable us recover valuable resources and reduce the volume of waste that would otherwise disposed of inappropriately.

Waste recycling

XPO Pollution Control is committed to achieve a cleaner environment through the separation of domestic waste by promoting recycling and converting them to resources.

At XPO Pollution Control treatment facility, our experienced staff are positioned to improve on waste reduction for a cleaner, healthier environment.

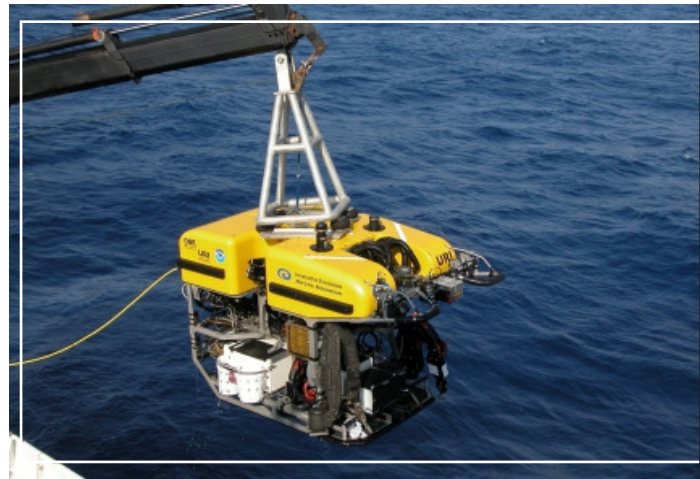

OUR SERVICES

Underwater Inspection and Maintenance with ROV:

By deploying our ROV we can perform high quality, extensive, portable and rapidly deployable ROV inspection services to offshore oil and gas, pipelines, overseas communication cables, ships and chain recovery at anchorage.

Hazardous Waste Management:

We have a specialized division equipped to manage hazardous and noxious substances generated during maritime operations. Our experienced team follows strict safety protocols to handle and dispose of such waste, minimizing risks to human health and the marine ecosystem.

Industrial Cleaning:

At XPO Pollution Control, we specialize in pre-operational chemical cleaning, vessel, and tank cleaning. We have the expertise that can ensure the cleanliness of your tanks either before or after use.

We deploy our experience professional, trained for confined space entry and employ advanced equipment for safe and efficient cleaning tasks.

OUR SERVICES

Consultancy and Compliance Services:

We offer consultancy and training to shipping companies, ensuring they are up to date with the latest regulations and best practices. Our experts assist in developing waste management plans, conducting audits, and achieving compliance with local laws and international guidelines.

*"Guaranteed, **on time Service Delivery**, every time."
- an **XPO** culture*

Environment Pollution Control:

Environment Pollution Control is the practice of managing and mitigating the release of pollutants into our surroundings. Our comprehensive solutions include cutting-edge technologies and strategies to minimize the environmental impact of industrial processes.

Spill Control:

Spill Control encompasses the methods and equipment used to contain and manage accidental spills of hazardous substances, preventing their spread and environmental damage. Our specialized services ensure swift and effective response to spill incidents.

OUR SERVICES

Solid Control:

Solid Control is vital in drilling operations to separate and manage solids like cuttings and drilling mud from the drilling fluid. At XPO, we provide state-of-the-art solid control solutions, promoting efficient and eco-friendly drilling practices.

*"We are dedicated to the **safety of our environment**"*
- An **XPO** core value

OUR SERVICES

Procurement and General Supply

XPO Marine services, understand the need for high quality products of materials and equipment. We offer a comprehensive procurement service such as marines' vessels and oil field consumables to companies.

At XPO Pollution Control, we pride ourselves on reaching international standard in all areas of our operation.

*"Practical solutions, always."
...an XPO mindset*

CSR

Environmental Education: XPO hosts workshops, webinars to educate employees and stakeholders about environmental issues and sustainable practices.

Marine Ecosystem Protection: We Collaborate with marine conservation organizations to support efforts in preserving and protecting marine ecosystems, including cleaning up coastal areas and conducting biodiversity studies.

Safety Training: XPO provides comprehensive safety training for employees working in challenging offshore environments. In addition, XPO ensure adherence to international safety standards and certifications.

Health and Wellness Programs: We offer wellness programs, mental health support, and access to medical services for employees working in remote areas.

Community Engagement: We prioritize local hiring and job creation in areas where we operate. Furthermore, XPO engages in community outreach and development programs, such as providing scholarships, sponsoring local events, or supporting community-based projects.

"At XPO, we believe in people."

WASTE RECEPTION FACILITIES UNDER MARPOL

Under MARPOL, Waste Reception Facilities (WRFs), the types operated by XPO, have important functions to help prevent marine pollution caused by ship-generated waste. The functions of a WRF include:

Receiving Ship-Generated Waste: Waste Reception Facilities are responsible for accepting and receiving waste from ships. This includes various types of waste generated on board ships, such as garbage, sewage, oily waste, and other hazardous materials.

Treatment and Disposal of Waste: WRFs may have the capability to treat and process certain types of waste to reduce its environmental impact. For instance, they may treat oily water to separate oil from water before appropriate disposal.

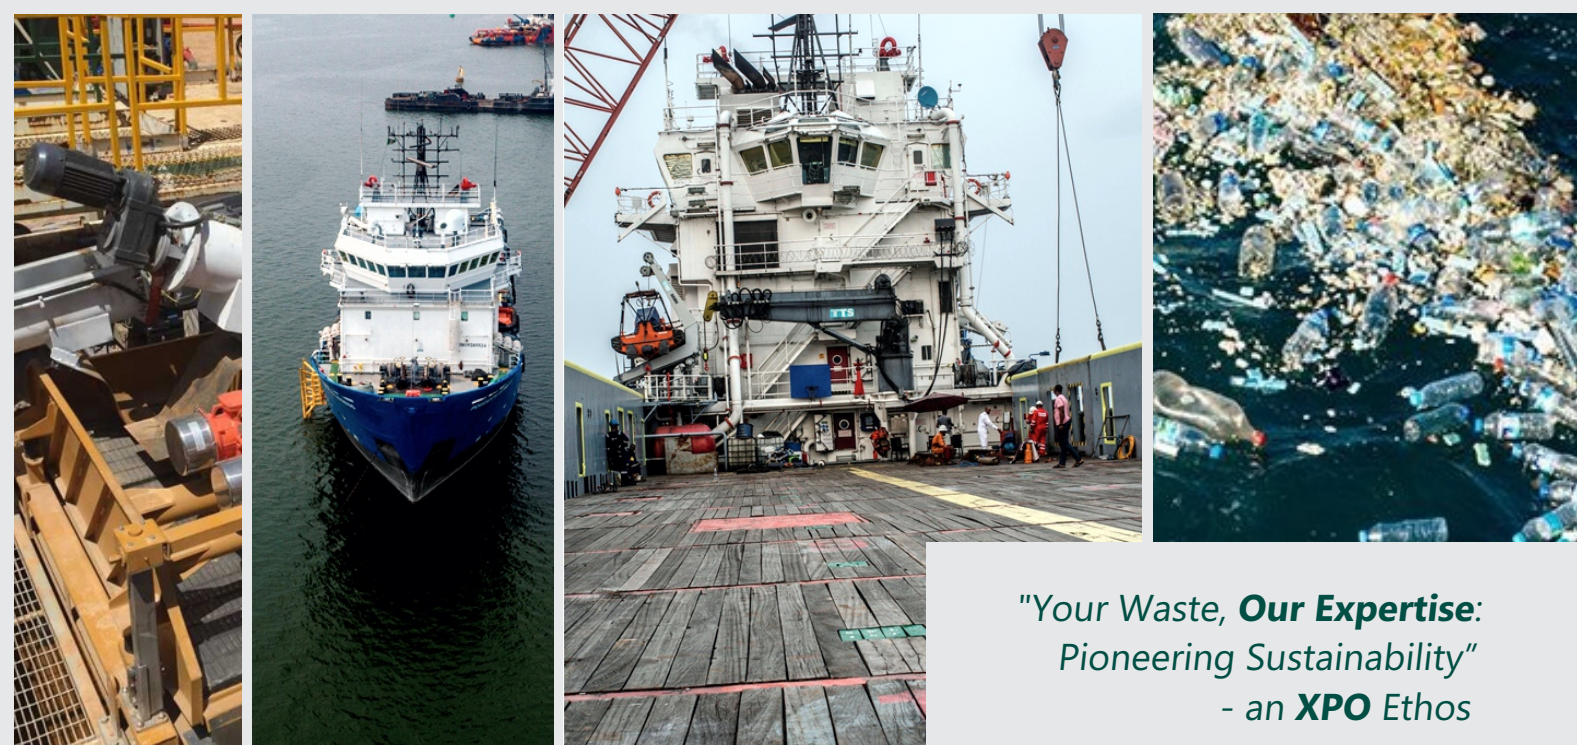

Safe Storage and Handling: WRFs must ensure that the received waste is stored and handled in a manner that minimizes the risk of spills, leaks, or any other accidental releases that could harm the marine environment or human health.

Verification of Compliance: Waste Reception Facilities are responsible for verifying that the waste received from ships complies with the regulations and restrictions outlined in MARPOL. They may inspect the waste to ensure it matches the ship's waste record book and that it is appropriately segregated according to MARPOL Annexes.

Documentation and Reporting: WRFs must maintain records of the waste received, treated, and disposed of from each ship. These records are essential for authorities to monitor compliance and assess the effectiveness of waste management practices.

Communication and Coordination: Waste Reception Facilities need to communicate and coordinate with ships, port authorities, and other relevant stakeholders to ensure smooth waste reception and disposal operations. They must be available and accessible to ships entering the port.

Education and Awareness: WRFs may also have a role in promoting awareness and educating ship crews about the importance of proper waste management and the harmful effects of marine pollution. This education can help foster a culture of responsible waste handling onboard ships.

*"Your Waste, **Our Expertise:**
Pioneering Sustainability"
- an **XPO** Ethos*

REGULATIONS PROVIDING WASTE RECEPTION FACILITIES

The regulations that provide for Waste Reception Facilities under MARPOL are found in Annexes I, IV, V, and VI of the convention:

Annex I (Oil): Regulation 38 of MARPOL Annex I requires each port and terminal provide adequate reception facilities for the reception of oily waste from ships.

Annex IV (Sewage): Regulation 12 of MARPOL Annex IV requires that adequate reception facilities for sewage be provided in ports and terminals.

Annex V (Garbage): Regulation 8 of MARPOL Annex V requires that adequate reception facilities for the reception of garbage, which includes both food and non-food waste, be provided in ports and terminals.

Annex VI (Air Pollution): While Annex VI does not directly address Waste Reception Facilities, it contains regulations related to emissions from ships, which are also vital in preventing pollution. Annex VI regulates air emissions, including those from ship exhausts and ozone-depleting substances.

The regulations in these annexes emphasize the importance of providing sufficient and adequate reception facilities to ensure that ships can discharge their waste properly, thus reducing the risk of marine pollution.

OPPORTUNITIES

With a passion for safeguarding the seas and marine life, XPO is a reliable partner for the maritime and oil & gas industries' waste management needs. XPO remains ideal for any organization seeking reliable, responsible, and effective pollution control solutions in offshore environments.

Our commitment to innovation, environmental protection, and regulatory compliance ensures that we continue to be a driving force in creating a cleaner and greener marine environment for future generations. By partnering with XPO, you gain a trusted ally dedicated to preserving marine ecosystems, upholding safety standards, and delivering innovative solutions.

*"A **people oriented** environment
With passion for
Growth and performance."
- an **XPO** experience*

WHY CHOOSE US

SAFETY COMMITMENT:

We prioritize safety in waste management handling, safeguarding your workplace and community.

PASSION AND RELIABILITY:

We are passionate about our work, and you can count on us for dependability and consistency in waste management solutions.

PROFESSIONALISM AND COST SAVING:

We adhere to standard and regulations, we are efficient in process of waste reduction strategies.

Our clients include offshore oil and gas companies, renewable energy firms, marine transportation companies, and governmental agencies overseeing offshore activities.

Our Key Differentiators:

Expertise: Our team comprises waste management professionals with extensive experience in offshore operations, ensuring the highest standards of safety and environmental responsibility.

Custom Solutions: We tailor our services to meet the specific needs of each client, ensuring cost-effectiveness and efficiency.

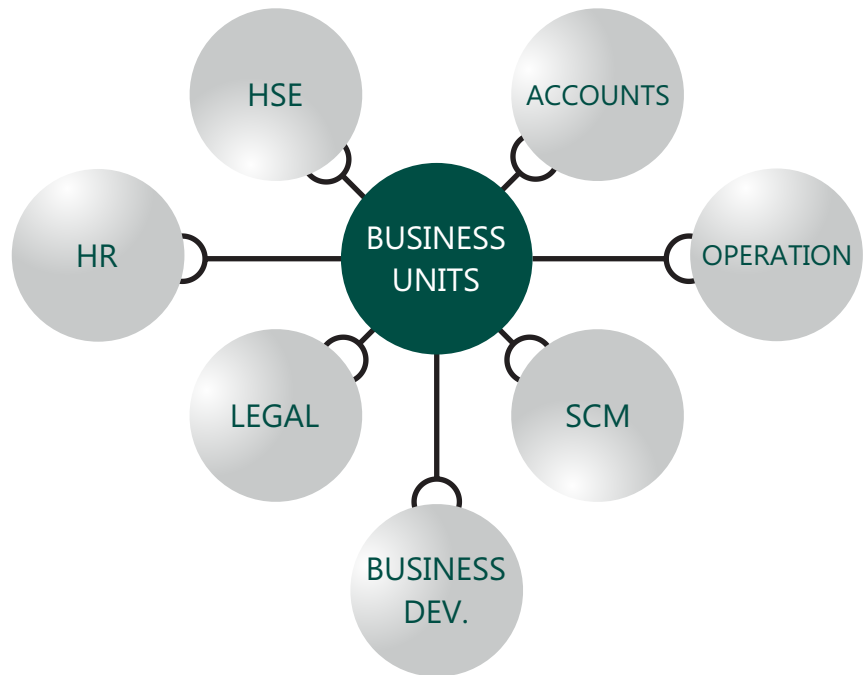

Technology Integration: We leverage advanced technologies, such as waste tracking systems and remote monitoring, to optimize waste management processes.

Certifications and Compliance: We adhere to industry-specific certifications and regulations.

BUSINESS UNITS
